Established 1994

(formerly Adcock and Associates)

Capability Statement

Environmental Planning Pty Ltd will provide quality environmental planning and development advice in a timely, cost effective manner. Documentation produced is realistic, comprehensive, objective and able to withstand detailed scrutiny. We will:

- manage and provide skilled and experienced multi-disciplinary professional advice for controversial or complex projects.
- commission and manage any specialist environmental inputs such as acoustics, archaeology, heritage, ecology, flora, fauna, landscaping and engineering as required for projects.
- obtain public authority approvals.
- provide project management skills.

We produce quality documentation quickly. Cost effective fees on a lump sum or hourly rate basis and timing will be negotiated for personalised service on projects anywhere in NSW. We have provided environmental planning advice to Councils, NSW government agencies and authorities, developers, contractors and major infrastructure operators.

Planning Services

- Environmental Impact Assessments
- Statements of Environmental Effects
- Reviews of Environmental Factors
- Environmental Management Plans
- Planning Documentation
- Environmental Audits.

Representative Experience

Reviews of Environmental Factors, Environmental Overviews, Environmental Management Plans and community consultation programmes for construction of over 100 highway, main road, freeway, tollway and bridge projects.

Development consents and modifications for extractive industry, an oil refinery, glass and paper recycling plants.

Development Application and Statement of Environmental Effects for the SuperDome/Acer Arena and adjacent car park at the Olympics 2000 Homebush site.

Environmental Management Plans and audits for major glass, paper, landfill, hardfill materials, works depot and waste recycling plants.

Independent assessments of Development Applications and environmental audits of public authority projects.
